Continued Prosecution Application

The request filed on 1-13-03 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/540466 is acceptable and a CPA has been established. An action on the CPA follows.

Claims 1-20 were cancelled.

Claims 21-29 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

It is noted that the claims of the instant application have been determined to include linking claims. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s) 21, drawn to a method for inducing angiogenesis in a mammal by administering an effective amount of a monomeric morphogenic protein. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or

Art Unit: 1642

nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Groups 1-17, claims 21-25, 29 drawn to a method for inducing angiogenesis in a mammal by administering an effective amount of <u>one</u> morphogenic protein as recited in Claim 23 or Claim 24 wherein the morphogenic protein is a <u>monomeric</u> protein, classified in Class 424, subclass 184.1. Applicant must elect a single morphogenic protein, each of which is a distinct invention.

It is noted that the claims of the instant application have been determined to include linking claims. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), 21, drawn to a method for inducing angiogenesis in a mammal by administering an effective amount of a dimeric morphogenic protein. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a

Art Unit: 1642

restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Groups 18-23, claims 21, 26-29 drawn to a method for inducing angiogenesis in a mammal by administering an effective amount of <u>one</u> morphogenic protein as recited in Claims 27-28 wherein the morphogenic protein is a <u>dimeric</u> protein, classified in Class 424, subclass 184.1. Applicant must elect a single morphogenic protein, each of which is a distinct invention.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups 1-23 are materially distinct methods which differ at least in objectives, method steps, reagents and/or dosages and/or schedules used, response variables, and criteria for success. For example, the reagent of Group 1 may comprise BMP-3, a completely distinct amino acid sequence from that which is administered in any one of Groups 2-23.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, restriction for examination purposes as indicated is proper. Furthermore, because these inventions are distinct for the reasons given above and the search required for one group is not required for another group, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/540,466 Page 5

Art Unit: 1642

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a petition under 37

CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Gary B. Nickol Ph.D. whose telephone number is 703-305-7143.

The examiner can normally be reached on M-F, 8:30-5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Anthony Caputa can be reached on 703-308-3995. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-305-3014 for regular

communications and 703-308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-0196.

Gary B. Nickol, Ph.D.
